Mr. Michael Horn
Precision Test Solutions
6120 Hanging Moss Rd.
Orlando, FL 01862

Dear Mr. Horn:

Re: Retention of Laboratory Suitability, January 1, 2021 through December 31, 2021,
MIL-STD-750F, FSC 5961, VQE-22-036953, Control Number: 079721

We have received your Annual Report for the assigned reporting period of January 1, 2021 through December 31, 2021. The report indicates conformance with the requirements of DLA Land and Maritime's Laboratory Suitability Information booklet. Therefore, the listing of your MIL-STD-750 capabilities as stated in your latest laboratory suitability letter, VQE-16-029973, will continue on the List of Commercial Laboratories Suitable for Testing Military Devices.

This suitability prohibits your company from removing or altering the device marking. Any device that fails testing conditions shall be identified (isolated) as a reject and returned to the device manufacturer for verification of failure mode.

Electrostatic discharge sensitivity (ESDS) requirements as stated in MIL-PRF-19500 are enforced by this Center. Therefore, all semiconductor devices will be handled as marked, unless otherwise notified by device manufacturer.

Your next retention of commercial laboratory suitability report must cover calendar year 2022 and be submitted by NLT March 1, 2023. It must be formatted to contain the items of Section IV of the DLA Land and Maritime booklet mentioned above. If we do not receive the report by this date, your capabilities may be removed from the List of Commercial Laboratories Suitable for Testing Military Devices.

If you have any questions, please contact Mr. Brad Deslich at 614-692-0593.

Sincerely,

RAYMOND L. KOLONCHUK
Chief
Electronic Devices Branch
